**LinkedIn:** [Almas Khalid - Senior Quality Assurance Automation Engineer | LinkedIn](#)

---

## **OBJECTIVE**

Pursue a challenging career with progressive organizations that provide high prospects of capitalizing on my technical skills and abilities while studying and cultivating my knowledge and expertise with the assistance of the company. I am courteous, enthusiastic, interested in IT and everything in its orbit. Seeking job opportunities in a reputed organization to utilize my skills through programming solution

## **EDUCATION**

### **BS Computer Science | 2014-2018 | University of Sargodha, Lahore.**

I have done my graduation in Computer Science from the University of Sargodha, Lahore.

My core subjects are Programming fundamentals, Object-oriented programming, Software Quality Assurance, Software Project Management, Software Requirement Engineering, Databases and Data Science.

### **Government College of Commerce, Lahore**

Intermediate in Computer Science (2014)

### **Government High School**

Matriculation (2012)

## **SKILLS**

- AUTOMATION TESTING - Design testing framework for Web Automation - Define test objectives, write test cases, and develop automation scripts - Evaluate projects and test scenarios.
- Extensive experience working in Automation Testing by using tools (Selenium WebDriver, JAVA, API Automation with Python, IntelliJ, Page Object Model, TestNG, Sikulix, Allure Reporting, GitHub, CI/CD Pipeline, TeamCity, API Automation, Postman, Trello, SoapUI, DB Testing)
- Extensive experience working in Agile Software Development Process, Software Development Life Cycle (SDLC), Software Test Life Cycle (STLC), and Software Bug Life Cycle.

- Experience in testing the applications following the Agile software development, bug tracking (analyzing the bugs based on severity, coordinating with developers and Team Leads to solve the high-priority defects), test case management, and executing the test cases.
- Experience in developing, and executing Technical Documents (Test Plans, Test Cases, Test Status Reports) Sending weekly and Daily Status Reports to Managers and clients.
- Taking part in Daily Standups and monthly Sprint Planning Meetings.
- Testing experience of Web Apps and Mobile apps (iPhone, iPad, Android) testing.
- Experience in participating in domain discussion meetings for requirements analysis and focus on major areas of improvement.

### **Specialties:**

- The ability to work to tight deadlines under pressure
- Clear communication
- Highly organized
- Innovative problem-solving
- Profound ability to work independently and with a team
- Attention to detail

### **Experience**

#### **1. Sr QA Automation Engineer | Seethrutech | July/2022 - Present**

I am working in Seethrutech as a Senior Automation QA Engineer. I am providing complete QA solutions & services i.e. Planning, Scripting, Test Execution, Manual/Automation QA, Project Management, and Reporting across Websites, Web Apps. I have worked on various projects from a variety of clients from American Healthcare.

### **Tasks**

- Perform automated and manual test design and execution within each Sprint/build
- Define and document test strategy, test plans, and test cases by evaluating functional and non-functional requirements
- Design, develop, and maintain test suites providing full coverage for components
- Develop/configure test automation framework
- Create and update test automation scripts and data files
- Manage the status of issues and changes in a bug-tracking tool and provide updates to the stakeholders
- Handle testing efforts for multiple projects/releases concurrently
- Conduct test case reviews and ensure requirements traceability, proper coverage

- Identify, collect, analyze, and report on software metrics
- Evaluate projects and test scenarios eligible for automation
- Ensures delivery against QA department goals and objectives, i.e. meeting commitments and coordinating overall quality assurance schedule
- Perform Test Planning
- Investigate customer problems
- Working with the end users/clients to create user acceptance test strategies and test scenarios to verify that the system works effectively
- Worked on tickets Estimation
- Keep track of the new requirements/changes in requirements of the Project
- Ensure accuracy, integrity, and timeliness of software package delivery to customers

**Tools & Technologies:** WebDriver, Selenium, POM, TestNG, Eclipse, CI/CD, IntelliJ, Confluence, Jira, Test rail, Postman, Docker, DB Testing.

## **2. Sr SQA Engineer | Cartlow | June/2021 July/2022.**

### **QA LEAD ACTIVITIES:**

- Managing various Projects while coordinating with the other dedicated team leads for their respective projects.
- Supervising various projects by liaising with other team leads to ensure all projects are working smoothly.
- Managing available resources effectively and efficiently according to the needs of every project.
- Allocating junior QA engineers to projects that would best suit their niche.
- Onboarding newly joined resourcing and guiding them to smoothly transition into their work.
- Collaborate with the product team, business team, and stakeholders for future requirements
- Ensure the process compliance
- Create customized project dashboards and maintain them
- Organize one-on-one meetings with the resources to hear their concerns and provide guidance to them.

## **3. Software Quality Assurance Engineer | eWare Technologies | Oct/2019 June/2021.**

### **Specialties:**

- Test planning, design, and execution
- Functionality, Sanity, Regression, User Acceptance testing
- Manual testing
- Tools for bug tracking and technical docs management (JIRA, Excel)

- Technical document development and execution.
- Sending weekly and Daily Status Reports to Managers and clients.

## **PROJECTS**

### **1 – Alivia Case Manager (USA)**

- Selenium, Java, TestNG
- Automated a comprehensive application handling 5000+ cases.
- Automated the same application with different client configurations.
- E2E Manual Testing.

### **2 – Alivia FWA Finder (USA)**

- Selenium, Java, TestNG
- Automated a comprehensive application handling 5000+ cases.
- Automated the same application with different client configurations.
- E2E Manual Testing.

### **3– Property DODO (Pakistan)**

- Conducted comprehensive testing of a real estate platform designed for property buying, selling, and renting, similar to Zameen.com.
- Performed functional testing to ensure all features such as property search, filtering, user registration, and property listing functionalities were working as expected.
- Executed usability testing to evaluate the ease of use, navigation, and overall user experience of the platform on both web and mobile interfaces.

### **4– Seagate Recovery Suite (Pakistan)**

- Coordinated with development teams to identify and resolve defects, contributing to the overall quality and reliability of the application.
- Created and executed test cases for user acceptance testing (UAT), ensuring that the platform met the requirements and expectations of end users.
- Worked closely with cross-functional teams, including developers and business analysts, to refine testing processes and enhance application performance

### **5– Cartlow B2C / IMS (UAE)**

- Performed functional testing to validate that core features, such as product search, filtering, product details, checkout, and payment processing, were working as expected.

- Led regression testing after each new feature release to confirm that updates did not affect existing functionalities.
- Collaborated with developers to identify, document, and resolve bugs and defects, ensuring a seamless user experience.
